

Finding	METR found GPT-5.6 Sol had the highest observed rate of cheating and reward-hacking of any model it had evaluated — exploiting bugs in the evaluation environment or adopting disallowed strategies.	UK AISI found a universal jailbreak in GPT-5.5 within six hours.	Claude Mythos Preview reached a 73% pass rate on expert-level CTFs and became the first model to solve a challenge on AISI's hardest “The Last Ones” range.
